

GeoNexus Technologies Receives Utility Network Management Specialty for Electric Solutions from Esri

GeoNexus® Technologies, an Esri® Silver Partner, was recently approved for the Utility Network Management Specialty for Electric Solutions through Esri.

ANN ARBOR, Mich. ([PRWEB](#)) June 15, 2020 -- GeoNexus® Technologies, an Esri® Silver Partner, was recently approved for the Utility Network Management Specialty for Electric Solutions through Esri. As a partner in the Utility Network Management Specialty, GeoNexus is recognized for “expertise with utilities and the implementation of Electric Solutions using the ArcGIS Utility Network Management Extension.”

In response to receiving the Utility Network Management Specialty, GeoNexus President Skip Heise commented, “We are honored to be recognized by Esri acknowledging our expertise and solution supporting the Utility Network. GeoWorx Sync is recognized by Esri for supporting Utilities with the transition from the Geometric Network to the Utility Network with incremental synchronization of geodatabases.”

GeoWorx Sync is a fully supported commercial off the shelf (COTS) solution that loads, synchronizes, and reports integrity of enterprise data maintained by multiple business systems and geodatabases. The software includes productized connectors to industry leading enterprise systems like Esri ArcGIS, IBM® Maximo, and Oracle Utilities CC&B. GeoNexus is continuing to expand the platform with additional connectors planned in the product roadmap.

About GeoNexus Technologies

At GeoNexus Technologies our mission is to provide our customers with a proven platform for system integration that is fully supported and ensures the integrity of their enterprise data. Our platform integrates data, applications, and workflows, easily and efficiently with no-code. We have productized connectors for enterprise systems from IBM, Oracle, ABB, Esri, SAP, and other industry leaders. Our integration platform is used by asset-intensive organizations across the globe in industries including utilities, telecommunications, pipeline, transportation, and government.
